Whether your priority is saving lives, transporting goods to market or just making it to work on time, Crown AGM Series Batteries deliver the power today’s vehicles need — and you count on — to get on the road and down to business.
CROWN1. Forward-Thinking Solutions for Critical Requirements.

The diversity of today’s applications and vehicle manufacturers means the world needs battery options to not only keep up with, but to stay ahead of the next innovation. That’s where Crown comes in.

Our CROWN1 AGM line features models for first response vehicles, OTR rigs, earthmovers, the latest hybrid car electrical systems and more. We combine the newest technology and best-practice manufacturing processes with tough, tested and proven designs, resulting in a collection of AGM options that deliver the power you depend on to start and energize your vehicle, accessories and critical equipment systems.

**Features**
- Super-Thick SolidCast plate construction, with more Active Material, and tougher, stronger top-lead connectors
- Increased cell compression
- Thick-wall container and massive terminal components
- Tough container and terminal designs ensure better reliability and better protection from vibration, impact and extreme temperatures
- Premium Glass Mat Separator

**Benefits**
- Durable, long-lasting plates that retain Active Material for the life of the battery - to deliver more CCA and cycling power when you need it.
- Enables additional plate content for lower IR, improved charge acceptance - and superior protection deep discharge performance
- Tough container and terminal designs ensure better reliability and better protection from vibration, impact and extreme temperatures
- High performance separator materials protect against damaging short-circuiting and short-life
